

Special Invitation
for SIA Schools only

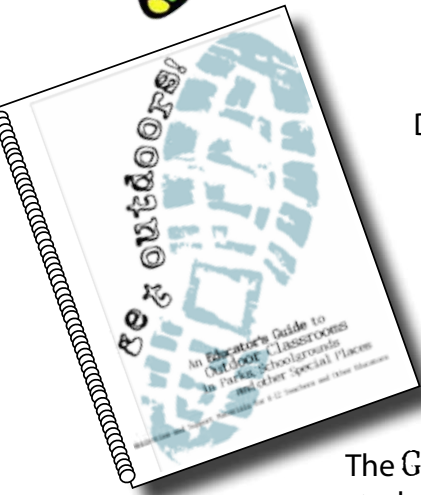

Science in Action

April 21, 2011

Dear Science in Action School,

Re: Limited Time offer to participate in Get Outdoors! for free

Thanks to funding and support from the Habitat Conservation Trust Foundation, WildBC is pleased to be able to offer 30 Science in Action schools our newest resource, **Get Outdoors!** This special opportunity is available to **30 Science in Action schools on a first come first served basis between June 2011 and June 2012.**

The **Get Outdoors!** educator's guide supports K-12 teachers in getting their students outside and engaged in experiencing the outdoor classroom. Activities include hands-on mapping, cultural explorations of special places, values exploration and secondary level projects. This guide includes "baby steps" for taking students outdoors – easy and powerful sensory awareness activities that help develop personal connections to nature. It also contains Teacher Tip Sheets and checklists covering group management, materials, field trip planners and the importance of the "100-Metre Field Trip". For more information on **Get Outdoors!** please visit www.wildbc.org.
